

Galosh Quick Reference

galosh log

New log entry: <CALL> [<RX-REPORT>] [<TX-REPORT>]

RX-REPORT and TX-REPORT can both be skipped, in which case a sensible default is chosen depending on your mode. For phone modes, a single digit x is taken to mean $5x$. For tone modes, a single digit is taken to mean $5x9$.

:set qrg 14260000 sets a new frequency, in Hertz.

:set mode SSB sets a new operating mode.

:set iota AN-001 updates your IOTA reference.

:d <ID> deletes a QSO (backup stored in .galosh/log.attic)

:q quits.

QSO Editing Mode

f to mark the QSO for followup.

C to edit the other station's call.

n to edit the other operator's name.

g to edit the other station's gridsquare.

i to edit the other station's IOTA reference.
